## Press Release – for immediate release

### **Cambridge Connectors and Büschel announce Distributor Agreement**

Cambridge Connectors of Cambridge, England and Büschel Connecting Systems of Jungingen, Germany have announced an agreement appointing Cambridge Connectors as Büschel's UK Distributor. As well as an extensive range of RF connectors for communication applications, the agreement also includes: - the unique Büschel Plug range; pH and Instrument connectors; and also a range of Circular connectors for harsh environments.

Established in 1925, Büschel specialises in the development, and production of high-precision electrical plug connecting systems for exacting requirements. Applications as far ranging as broadcast; telecom, laboratory; instrumentation, mining; off-shore operations; petro-chemical; aerospace and avionics; and transportation are all encompassed by Büschel products. Cambridge Connectors, with their expertise in engineering solutions and product design, are ideally placed to provide technical support to their customers on Büschel's comprehensive product mix.
