

## **Press Release – for immediate release**

### **Finnish Line achievement for Cambridge Connectors**

Cambridgeshire based interconnect specialist, Cambridge Connectors, has announced a new distributor agreement with Finland based connector manufacturer, Perlos to sell its backplane connector range in the UK. This includes DIN 41612 as well as "Hardmetric" and "Futurebus" products. Perlos is one of the few connector producers to support C/4, R/4 quarter body DIN 41612 connectors. Also available under the agreement is the versatile mixed layout DIN 41612, which allows signal, RF, pneumatic and power contacts to be combined in the same connector.

Commenting on the agreement, Cambridge Connectors' Chairman and CEO, Michael Wilson, said, " We have enjoyed a successful informal trading partnership with Perlos for over 15 years. This agreement cements that relationship and demonstrates our long-term commitment to promoting Perlos' high precision products into the UK. Their unrivalled reputation for quality perfectly matches the high demands of our customers in the telecommunications, data transmission, aerospace and industrial measurement & controls sectors."

Also included in the agreement is a wide range of cable and stackable housings, hoods, locking frames, shrouds and latches enhancing the design solutions that can be offered.
