

PRESS RELEASE – For immediate release

Sullins and Cambridge Connectors announce Distributor Agreement

Sullins Electronics Corporation of California, a world leader in the design and manufacture of connectors & interconnect systems, announced today that Cambridge Connectors has been appointed a distributor for the "Sullins" and "Micro Plastic" range of connectors in the UK. The products featured under the agreement include conventional, lead-free and RoHS-compliant edge cards, headers and bi level connectors, including parts engineered for high-temperature applications. These are used in aerospace, medical instrumentation and test equipment as well as communications, entertainment and broadcast applications.

Established in 1971, Sullins (www.SullinsElectronics.com) is a world leader in the design, engineering, and manufacturing of high quality UL/CUL approved edgecards; it focuses on providing an in depth product development services together with a high level of engineering support.

Cambridge Connectors (www.cambridgeconnectors.com) has over 20 years experience in specifying and manufacturing interconnection products. This expertise puts it in an ideal position to advise clients about the Sullins / Micro Plastics product range. Its experienced engineers work in close partnership with its customers from original concept and specification through to prototyping and full production runs.

About Sullins Electronics

Headquartered in San Marcos, CA, Sullins Electronics, Corp. (www.SullinsElectronics.com) has been a world leader in the design, engineering, and manufacturing of high-quality edge cards and headers since 1971. The Company provides the industry's widest selection of UL/CUL approved edge cards, and additionally offers product development services together with engineering support. Sullins' edge cards, headers, bi level and CompactPCI™ connectors are widely specified for use in mission-critical applications by a broad spectrum of leading industrial, commercial, military and consumer products manufacturers. Sullins' connectors and interconnect systems are offered through a global network of sales representatives and distributors.

About Cambridge Electronic Industries Ltd.

Cambridge Electronic Industries Ltd. (www.cambridgeconnectors.com) is a leading UK-based manufacturer and supplier of high quality interconnect components for use in communications, broadcast, instrumentation, automation and varied industrial applications. Capabilities include electronic connectors, cable assemblies, sub-systems and enclosures, as well as custom/application-specific products. The Company's support team consists of highly trained and experienced design and development engineers who provide customers with a broad base of industry knowledge and technical experience. Cambridge's factories are ISO9000 certified to assure the highest standards of supply, performance, and durability.
